## Conference call takeaways

- Management has guided for 25+ ANDA launches in FY2018.
- Plans to file 30 ANDA's in US.
- R\&D as \% of sales to be at 12-15\% in FY2017.
- Currently $\sim 23 \%$ of the company's domestic portfolio is under NLEM.
- Tax rate guided to be between $28-30 \%$ of PBT.
- Higher tax rate in 3QFY2017 was attributed to unwinding of deferred tax and subsidiary losses.
- Capex guidance, $₹ 1,500 \mathrm{cr}$ in FY 2018 .

## Recommendation rationale

- US market - the key driver: The high-margin branded generic business has been the key differentiator for Lupin in the Indian pharmaceuticals space. On the generic turf, Lupin is currently the fifth largest generic player in the US, with $5.3 \%$ market share in prescription. Lupin is now the market leader in 42 products marketed in the US generics market and is amongst the top 3 by market share in 78 products. Currently, the company's cumulative filings stand at 344 , of which 207 have been approved, with 45 FTFs valued at more than US\$13bn. Lupin plans to launch 25-30 products in the US in FY2018. We expect the region to post a CAGR of $33.9 \%$ over FY2016-18E on the back of new product launches.
- Domestic formulations on a strong footing: Lupin continues to make strides in the Indian market. Currently, Lupin ranks No 3, and is the fastest growing company among the top five companies in the domestic formulation space, registering a strong CAGR of $20 \%$ over the last few years. Six of Lupin's products are among the top 300 brands in the country. Lupin has a strong field force of $\sim 6,000$ MRs (as of FY2016). We expect the domestic formulation market to grow at a CAGR of $15.0 \%$ over FY2016-18E.
- First-mover advantage in Japan: Lupin figures among the few Indian companies with a formidable presence in Japan, the world's second largest pharma market (Lupin ranked as the $8^{\text {th }}$ largest as per IMS MAT March 2014). The Management believes there will be patent expiries (US\$14-16bn) in the next two years in the Japanese market, which along with increased generic penetration would drive growth in the market. The Management expects improvement in growth in the next 3-4 years. On a conservative basis, we expect the market to post a CAGR of $10 \%$ over FY2016-18E.

## Valuation

We expect Lupin to post a net sales CAGR of $21.7 \%$ to $₹ 20,304 \mathrm{cr}$ and earnings CAGR of $23.0 \%$ to $₹ 76.4$ /share over FY2016-18E. Currently, the stock is trading at $19.2 x$ its FY 2018 E earnings, respectively. We recommend a Buy rating on the stock.

## Company Background

Lupin, established in 1968, is primarily engaged in the manufacture and global distribution of active pharmaceutical ingredients (APIs) and finished dosages. Over the years, the company forayed into the US markets through a differentiated export strategy of tapping branded generics and consequently gaining a large share of the US prescription market. Further, to expand its footprint in the global markets, Lupin has prudently adopted the inorganic growth route. In-line with this, over the last two years, the company made small acquisitions across geographies, prominent among these being the acquisition of Kyowa in the growing Japanese market. In the US, the company has acquired privately held Gavis Pharmaceuticals LLC and Novel Laboratories Inc. The acquisitions have enhanced Lupin's scale in the US generic market and have also broadened its pipeline in dermatology, controlled substance products and other high-value and niche generics.
