## Outlook and Valuation

We expect CPIL to report net revenue CAGR of $\sim 17 \%$ to $\sim ₹ 2,896$ cr over FY201720E owing to healthy growth in plywood and lamination business, foray into MDF and particle boards coupled with strong brand and distribution network. On the bottom-line front, we expect CAGR of $\sim 16 \%$ to $₹ 306 \mathrm{cr}$ over the same period on the back of strong revenue and better margins in MDF business. We maintain our BUY rating on the stock with target price of ₹ 400 .

## Downside risks to our estimates

- Most of the company's raw materials are imported from other countries, and considering that the company has ECB loans, any unfavorable change in currency may pose forex risks, which could significantly impact margins.
- Recently, the company has added a new MDF plant with capex of ` 380 cr , any slowdown in MDF market can impact the company's earnings due higher fixed cost overheads.
