Ongoing earning season confirms revival in domestic consumption

In October 2016 Top Picks report, we had shown faith in the India's consumption story. The ongoing earning season confirms our bias as companies in the consumption sector have reported decent set of numbers so far. Most notably, companies in automobile sector have emerged as beneficiary of the ongoing recovery in the consumer demand. The management commentary of following the results indicated that some green shots of recovery are seen in rural market and more growth will be visible in the next few quarters. We also observe improving sales and operating margins of some companies from food processing, pesticide, paint, and plastic industries. As the consumer demand strengthens, corporate earnings are also expected to pick-up.

Exhibit 1: Revival trends in Q2FY17 in consumption sectors

Sector	Observations
Automobile	Strong volume and earnings growth, rural volumes picking up
Building materials, home furnishing	Improving sales of ceramic tiles, plastic pipes, plywoods, laminates etc.
Entertainment/ Media	Increasing traction in Ad spending by corporates
Consumer durables	Increase in domestic appliances and AC sales, 20% rise in sales reported by E-commerce sites (Flipkart, Amazon and Snapdeal) in 1 st week of October

Source: Company, Angel Research

Latest PMI suggests manufacturing sector is gathering steam

Our confidence also stems from the October reading of Nikkei India Manufacturing PMI, which stood at 54.4%, highest in the last 22 months suggesting that domestic manufacturing sector is undergoing recovery on the back of healthy increase in orders and output.

Exhibit 2: Manufacturing PMI at 22 month high

Record food grain production to pave way for further rate cut

Thanks to the monsoon this year, a record food grain production is expected in FY17. This will further help to curb the food inflation in the country. On this backdrop, RBI may cut the interest rates which will decline bond yields further. Due to low yields, equity has emerged as an attractive asset class and this can clearly be seen from the negative FII inflows in the debt this year so far. In the earlier instances when FII inflows in debt were negative, equity generated strong returns in the subsequent year. The falling bond yields and improving macros are possibly indicating that we will see a strong equity market next year and inflows will also remain strong.

Exhibit 3: Record food grain production on cards

Source: Angel Research

Liquidity support to continue

As the economy is gearing for a GDP growth of 7-8% in next two years, equity markets look bit concerned over possible rate hike by the Federal Reserve (Fed) which may cause some liquidity tightening. There is, however, good scope to believe that liquidity may sustain going forward. Last year, the Fed increased the interest rate after a gap of 7 years and there haven't been any further hikes so far. Even though Fed has given green signal for December hike, we believe that rate hike will be gradual which will avoid any tremors in the financial markets. The Bank of Japan and European Central Bank continue to provide liquidity support through their liquidity oriented monetary policies. So, there is a strong room to believe that ample liquidity will remain in the markets in near future.

Overall, this year we are seeing a lot of positive things happening in the Indian economy. However, there could also be some challenges if Fed goes for accelerated interest rate hikes instead of gradual hikes. Despite this, we believe that India remains an attractive market for investors due to recovery in consumer demand and improving macros.

Our top-picks are focused on companies that will benefit from strong consumption and low interest rates. This includes stocks from interest sensitive sectors like Dewan Housing, Mahindra Lifespace, etc., and consumption sector like Bajaj Electrical, Amara Raja, Blue Star, Asian Granito, Mirza International, etc.

Dewan Housing

- **3rd largest private sector housing finance company:** We expect DHFL's AUM to grow at a CAGR of 21% over FY2016-18, as demand for housing in the middle and low income group picks up, while PAT CAGR is expected to be 23%.
- **Seasoned and granular loan book with stable asset quality:** Individual borrowers account for 72%, while the high yielding loan against property (LAP) +SME and projects loans account for 19% and 9% of advances respectively. Despite strong loan growth, the GNPA's and NNPA's are likely to be at ~1.17% and 0.82%, respectively, for FY2017. We don't expect any major deterioration in the asset quality going ahead.
- **Lower cost of funds will help maintain NIM:** Nearly 70% of the bank borrowings are due for maturity over the next three years and recently DHFL was able to raise large sum ~ Rs14, 000 cr via NCDs at a competitive rates and this should help maintain its NIM at ~2.9%.
- **Outlook:** We expect the company to post a healthy loan book CAGR of 21% over FY2015-18E, which is likely to translate in an earnings CAGR of 23%, over the same period. The stock currently trades at 1.5x FY2018E ABV. **We have an Accumulate stand on the stock, with a target price of ₹350.**

Source: Company, Angel Research

Equitas Holdings

- **Early mover advantage in the SFB category:** Equitas was one of the ten NBFCs to get the license to start a small finance bank (SFB). As the entire book of Equitas qualifies for PSL, meeting the 75% PSL target will not be a challenge. Sizeable and diversified loan book will keep it ahead of other upcoming SFBs.
- **Asset quality and return ratios are likely to remain stable:** Equitas will have to maintain CRR & SLR going ahead; hence yield on total assets is likely to come down. However, as a bank it will be able to raise deposits and hence there will be reduction in cost of funds. As a result, spreads may not decline much which in turn will help in maintaining the ROE & ROA which although could undergo a marginal decline. Also we don't expect any major deterioration in the asset quality going ahead.
- **NIM likely to remain healthy:** After conversion to SFB the company has started raising deposits at a lower cost vs borrowings leading to better cost of funds. Hence we expect the NIM to remain strong at ~10-11%, going ahead.
- **Outlook:** We expect the company to post a strong loan book & earnings CAGR of 38% & 37% over FY2016-18E. The stock currently trades at 2.3x FY2018E BV. **We maintain Buy on the stock, with a target price of ₹235.**

Amara Raja Batteries

- Amara Raja Batteries Ltd (ARBL) is the second largest lead acid storage battery manufacturer in the country. It has been outpacing market leader Exide (ARBL grew at a 21% CAGR over FY2010-16 as compared to standalone Exide's growth of 7%), leading to its market share improving from 25% in FY10 to about 35% currently. ARBL's outperformance has been mainly on back of its association with global battery leader Johnson Controls Inc (which also holds 26% stake in ARBL) for manufacturing ducts.
- With the automotive OEMs following a policy of having multiple vendors and with ARBL's products enjoying a strong brand recall in the replacement segment, the company is well poised to gain further market share. Given the economic recovery and market share gains, the company is expected to grow at a CAGR of 18% over the next two years as against industry growth of 10-12%.
- ARBL is a well diversified auto ancillary player having presence across the automotive and the industrial segment. It has a broad OEM as well as replacement customer base. We believe ARBL is a high quality stock to play the auto sector revival. **We maintain our Buy rating on the stock.**

Asian Granito

- AGIL's current, vitrified sales (35%) are lower as compared to its peers like Somany Ceramics (47%) and Kajaria Ceramics (61%). Recently, AGIL has launched various products in premium segment. Going forward, we expect AGIL's profit margin to improve due to increase in focus for higher vitrified product sales, which is a high margin business.
- AGIL is continuously putting efforts to increase the B2C sales from the current level (35% in FY16). It is expected to reach up to 50% in next 2-3 years on the back of various initiatives taken by AGIL to increase direct interaction with customers like strengthening distribution network, participation in key trade exhibition, etc.
- In July FY2016, AGIL acquired Artistique Ceramic which has a better margin profile. Going forward, we expect the company to improve its operating margin from 7.5% in FY16 (excluding merger) to 12-12.5% in coming financial year. Artistique Ceramics has a contract with RAS GAS to supply quality natural gas at a discounted rate of 50% to current market rate, which would reduce the overall power & fuel cost of the company.
- We expect AGIL to report a net revenue CAGR of ~9% to ~₹1,182cr and net profit CAGR of ~39% to ₹48cr over FY2016-18E. **We have a Buy rating on the stock and target price of ₹351.**

Bajaj Electricals

- The company is among the top 4 players in the consumer durables space across all its product categories (leader in small appliances; number-4 in fans and lighting). It has a strong distribution reach with 4,000 distributors reaching out to 400,000 retailers.
- In the 3 years preceding FY2016, the company's E&P segment had been underperforming owing to cost overruns and delays in project executions. However, the segment has turned around in FY2016 on the profitability front and delivered a healthy EBIT margin of ~6% for the year. Currently the segment's order book stands at ₹2,480cr.
- With expectation of timely execution of new projects in the E&P segment and with the Lighting and Consumer Durables segments expected to benefit from an improvement in consumer sentiments going forward, we expect the company's top-line to grow at a CAGR of ~12% to ₹5,805cr and bottom-line to grow at a CAGR of 24% to ₹147cr over FY2016-FY2018E. **We recommend a Buy rating on the stock.**

Blue Star

- BSL is one of the largest air-conditioning companies in India. With a mere 3% penetration level of ACs vs 25% in China, the overall outlook for the room air-conditioner (RAC) market in India is favourable.
- BSL's RAC business has been outgrowing the industry by ~10% points over the last few quarters, resulting in the company consistently increasing its market share (~7% in FY2014 to 10.5% at present). This has resulted in the Cooling Products Division (CPD)'s share in overall revenues increasing from ~23% in FY2010 to ~42% in FY2016 (expected to improve to ~47% in FY2018E). With strong brand equity and higher share in split ACs, we expect the CPD to continue to drive growth.
- Aided by increasing contribution from the CPD, we expect the overall top-line to post a revenue CAGR of ~16% over FY2016-18E and margins to improve from 5.3% in FY2015 to 7.3% in FY2018E. Moreover, the merger of Blue Star Infotech has infused cash and strengthened the balance sheet. **We have an Accumulate recommendation on the stock.**

Mirza International

- In the branded domestic segment, we expect the company to report a ~24% CAGR over FY2016-18E to ₹346cr. We anticipate strong growth for the company on the back of (a) the company's wide distribution reach through its 1,000+ outlets including 120 exclusive brand outlets (EBOs) in 35+ cities and the same are expected to reach 200 over the next 2-3 years and (b) strong branding (Red Tape) in the shoes segment.
- MIL's major export revenue comes from the UK (73%), followed by the US (14%) and the balance from ROW. Export constitutes ~75% of the company's total revenue. We expect the company to report healthy growth over the next 2-3 years on back of recovery in the UK market, strong growth in the US market and with it tapping newer international geographies like the Middle East countries.
- In FY2016, the company acquired Genesis Footwear which has a better margin profile than it. The deal resulted in MIL's EPS increasing by ~4% and ROE improving from 15.9% to 17.5%. Further, due to this merger, the company's capacity has increased from 5.4mn to 6.4mn units.
- We expect MIL to report a net revenue CAGR of ~11% to ~₹1,148cr and net profit CAGR of ~11% to ₹97cr over FY2016-18E. **We have a Buy rating on the stock and target price of ₹113.**

Siyaram Silk Mills

- SSML has strong brands which cater to premium as well as popular mass segments of the market. Further, SSML entered the ladies' salwar kameez and ethnic wear segment. Going forward, we believe that the company would be able to leverage its brand equity and continue to post strong performance.
- The company has a nationwide network of about 1,600 dealers and business partners. It has a retail network of 160 stores and plans to add another 300-350 stores going forward. Further, the company's brands are sold across 3,00,000 multi brand outlets in the country.
- Going forward, we expect SSML to report a net sales CAGR of ~12% to ~₹2,040cr and adj.net profit CAGR of ~14% to ₹115cr over FY2016-18E on back of market leadership in blended fabrics, strong brand building, wide distribution channel, strong presence in tier II and tier III cities and emphasis on latest designs and affordable pricing points. At the current market price, SSML trades at an inexpensive valuation. **We have an Accumulate recommendation on the stock and target price of ₹1,714.**

HCL Technologies

- Healthy pipeline:** Company's engineering services has been seeing lumpy growth over the last few quarters. This is however largely a function of the timing of large transformational deals. 6-8 of the large deals signed a few quarters ago will aid the company to continue to post industry leading growth. We expect HCL Tech to post a USD and INR revenue CAGR of 16.3% and 18.0%, respectively, over FY2016–18E (inclusive of the acquisition of Geometric Software and the Volvo deal).
- Robust outlook:** For FY2017 revenues are expected to grow between 12.0-14.0% in CC. Revenue guidance is based on FY2016 (April to March'2016) average exchange rates. The above constant currency guidance translates to 11.2% to 13.2% growth in US\$ terms.
- Outlook and Valuations:** The stock is attractively valued at the current market price and hence we maintain our Buy with a price target of ₹1,000.

Key Financials

Source: Company, Angel Research

Infosys

- Revenue guidance for FY17:** The Management has lowered its guidance for FY2017, to 8-9% in CC terms and 9.2-10.2% in INR terms (exchange rate as on March 31, 2016). For FY2016, the company posted a 13.3% growth in CC terms V/s a guidance of 12.8-13.2% growth (in CC). We expect the company to post ~9.0% USD revenue growth in FY2017.
- Aims to be US\$20bn company by FY20:** Company expects its revenue to rise to US\$20bn by FY2020, up from US\$8.7bn in FY2015, as it focuses on acquisitions and winning more new technology services, implying a 14% CAGR over the period. Over the near term, we expect Infosys to post a 9.0% USD revenue growth in FY2017. Over FY2016-18E, we expect USD and INR revenue to grow at a CAGR of 9.0% and 9.5%, respectively.
- Outlook and Valuations:** The stock trades at a valuation of 14.1x FY2018E earnings. We recommend Buy on the stock with a price target of ₹1,249.

Jagran Prakashan

- We expect JPL to register a net sales CAGR of ~12% over FY2016-18E, on back of (a) strong growth in advertising revenue due to improvement in GDP growth, and (b) improvement in circulation revenue owing to combination of increase in cover price and volume growth.
- Further the acquisition of Radio City would also boost the company's revenue going ahead. Radio City has ~20 stations across 7 states in the country and is second only to ENIL in all its operating circles, ie Delhi, Mumbai, Bengaluru, Chennai, Ahmedabad, Hyderabad, Pune and Lucknow. The company covers ~51% (~66mn people) of the total radio population.
- Raw material prices have been in a declining trend. Thus, considering lower news print costs, healthy sales, and higher margins in the radio business, we expect an adj. net profit CAGR of ~12% over FY2016-18E to ₹409cr.
- Considering Dainik Jagran's strong presence in the rapidly growing Hindi markets, we expect JPL to benefit from an eventual recovery in the Indian economy. **Hence, we maintain a Buy rating on the stock with a target price of ₹225.**

TV Today Network

- TTNL enjoys a strong viewership ranking in the Hindi and English news channel categories. The company's Hindi news channel – Aaj Tak has maintained its market leadership position occupying the No.1 rank for several consecutive years in terms of viewership. Its English news channel - India Today too has been continuously gaining viewership; it has now captured the No. 2 ranking from No. 4 earlier. Its other channels like Dilli Aaj Tak and Tez are also popular among viewers.
- Out of the 7 radio stations, TTNL has sold off 4 (Jodhpur, Amritsar, Patiala and Shimla) for ₹4cr. The remaining 3 stations are in the process of getting sold off to ENIL but the sale will have to wait until concerns raised by the MIB are resolved. Going forward, we expect them to be sold off and this would prop up the company's profitability.
- We expect TTNL to report a net revenue CAGR of ~16% to ~₹743cr and net profit CAGR of ~16% to ₹128cr over FY2016-18E. **We have an Accumulate recommendation on the stock and target price of ₹385**

Mahindra Lifespace

- MLF has 13 projects under implementation across cities. MLF has exhibited fast completion of projects compared to others. Sales cycle in ~65% of projects is faster than execution cycle, contrary to industry trends. This fast execution and sales is optimal, as it helps MLF in revenue recognition, inventory cycle (better than Oberoi, DLF), cash flows and profitability. This translates in creating a virtuous cycle of continuous fast growth.
- MLF as of 4QFY2016 is pursuing ~4.0mn sq. ft. of sale of the total ~15.0mn sq. ft. of saleable area. Having sold ~60% of ongoing projects, we expect MLF to launch ~2.8mn sq.ft. of saleable area in rational way during 4QFY2016-2QFY2018E, across 6 cities. Maturity at existing projects, new launches give better revenue visibility for medium-term. Further, MLF is sitting on land bank of 11.0mn sq.ft across 4 cities, which allays any concern over long-term revenue growth.
- With Real Estate Regulatory Bill closer to reality, MLF should be minimally impacted, given their strong parentage and ethically implemented processes. In the longer-term organized, professionally run, well funded players would enjoy strong trust due to their reliable and fast execution strategies. With improvement in company's fundamentals, strong earnings growth visibility and long-term growth outlook, at current valuations of 1.1x FY2017E P/BV, MLF looks attractive. **We maintain BUY on MLF with target price of ₹522.**

Navkar

- NCL is one of the largest and one of the three CFS at JNPT with rail connectivity, helping it garner high market share at the port. NCL is in a massive expansion mode where it is increasing its capacity by 234% to 1,036,889 TEUs at JNPT and coming up with an ICD at Vapi (with Logistics Park).
- The ICD with rail link should benefit from first mover advantage in a region that has huge market potential and accounts for ~27% of volumes at JNPT. The ICD should be able to capture the EXIM volumes from the region through rail link that till now was being custom cleared at JNPT (Import) or being transported via road and consolidated at JNPT (Export). South Gujarat volumes will now head straight to the Vapi ICD; thus the company can now cater to bulk commodities and domestic traffic that it had been rejecting owing to capacity constraints at CFS.
- We expect NCL to successfully use its rail advantage and scale up its utilizations at both JNPT and Vapi ICD. **We have a Buy rating on the stock.**
