## News Analysis

### Economic Survey lays out blueprint for growth to make India a \$5-trn economy

The Economic Survey on Thursday prescribed a private investment-led growth strategy to achieve Prime Minister Narendra Modi's vision of making India a \$5 trillion economy.

The Survey said India needs to cut real interest rates, ease labour rules, reduce capital gains tax on startup investments and encourage infant firms to grow at a sustained 8% rate to reach the GDP target by 2024-25.

The 2018-19 Survey, authored by chief economic adviser in the finance ministry Krishnamurthy Subramanian, projected the Indian economy to grow at 7% in the year ending 31 March, slightly faster than 6.8% achieved in the previous year.

The Survey said Investment rate, which was declining from 2011-12, seems to have bottomed out. It is expected to pick up further in the year 2019-20 on the back of higher credit growth and improved demand. It added that as investment depends crucially on a low cost of capital, reducing real interest rates need not necessarily lower savings when the demographics are favourable.

The Survey favours incentivizing firms based on their lifespan rather than on size, which leads to "dwarfing" of MSMEs, encouraging them to remain small. Dwarfs, which the Survey defines as small firms that never grow beyond their small size despite surviving for more than 10 years, dominate the Indian economy and hold back job creation and productivity.
