

Market Cues

Indian markets are likely to open positive tracking global indices and SGX Nifty.

The US stocks have shown a lack of direction over the course of the trading day on Thursday. The major averages have spent the day bouncing back and forth across the unchanged line. The Dow was up modestly by 0.4 percent to 25,579 and the Nasdaq was flat at 7,767.

U.K. markets opened lower on Thursday and stayed that way throughout the session on continued concerns about the health of the global economy. The FTSE 100 fell by 1.1 percent to 7,067.

On domestic front, Indian shares rebounded from their worst fall in over a month on Wednesday as the U.S. announced a delay in the implementation of tariffs on some Chinese products and a lower than expected wholesale price index reading for July raised hopes of further cuts in interest rates going forward. The benchmark BSE Sensex jumped by 1.0 percent to 37,311.

News Analysis

June quarter earnings show no signs of a revival for Indian companies

Weak demand, slow private sector capital expenditure, liquidity tightness and sluggish government spending in the poll season continued to take its toll on corporate India's earnings in the June quarter. Net profit fell by 5.23% for the three months ended 30 June from a year earlier, showed an analysis of 1,284 listed companies.

While the June quarter earnings were incrementally better than those of the preceding three months, in which they fell by 8.46%, a full recovery may still be far away. In the same quarter last fiscal, the same set of companies had registered a yearly earnings growth of 21.1%. Analysts said revenues of some companies were hit by muted volumes owing to low discretionary spends, rupee fluctuations, slow progress of the monsoon and delayed private sector spending, while lower prices of commodities such as crude oil offered some respite. In the June quarter, net sales grew 4.6%, an eight-quarter low, slower than the 14.2% growth in the preceding three months, according to data provider Capitaline. This compares to net sales growth of 19% in first quarter of FY19.

During the quarter, operating profit margin narrowed to 19.42% from 19.56% a year earlier. The review excludes banks, financial services and oil and gas firms, as they follow a different revenue model.
